

Phoenix network•series

High Performance Development Board for Triple Play Voice, Data & Video Application

Phoenix Network Series

Technologies

Applications

VoIP FXS x2

USB 2.0

LAN FE x4

WAN GigE

Fibre Interface (SFP)

12V DC Power

Wireless/WiFi

WiMAX

3G HSDPA

Fiber

VoIP

Medical Telemetry

WiMAX CPE

3G Router

LTE

Optical Network Terminal

Key Benefits

- Jump-Start Development
- Shorten Time to Market by 6-8 Months and Gain Competitive Edge
- Reduce Development Costs
- Multiple Product Applications

Designed & Developed By

Embedded Wireless Labs Sdn Bhd (426008-A)

702 Level 7, Uptown Two

No 2 Jalan SS21/37, Damansara Uptown
